

**Bespoke Training**

**Managing REACH for Downstream Users: How compliant are you?**

REACHReady offices, London, your location or webinar

**Who should attend?**

Since 2007, **formulators and other Downstream Users** have been working through the complex detail of REACH legislations, often delegating responsibility for doing so to the HS&E or Regulatory Team.

But, costly mistakes are known to have been made, so:

- ✓ how do you check that your company is on track?
- ✓ how do you minimise the risk of a REACH-related supply chain failure to your business?
- ✓ what can you do if something goes wrong?

This **REACH compliance** day is aimed at business and technical managers working in the **chemical using sectors**. It will outline the key compliance measures that you should be taking into account in your own business – and important assurance checks to make of your suppliers.

**Why attend?**

Robust, audited compliance documentation is a valuable way of demonstrating that your company is complying with both the legalities *and spirit* of REACH in the UK and EU 27 member states.

This workshop will outline the essentials of a REACH gap analysis and compliance strategy that will help you:

- ✓ identify if you are doing all you can to comply
- ✓ recognise where business risks are likely to occur and how to minimise them
- ✓ decide if conducting an internal or supplier audit is right for your business

The practical implications of the UK withdrawal from the EU will be discussed throughout the day.

**Next Steps**

To find out more about REACHReady's bespoke training, and to discuss your specific requirements, please call us on **0207 901 1444** or e-mail [events@reachready.co.uk](mailto:events@reachready.co.uk)

**Suggested Programme**
